

Amit Prajapati - Senior Flutter Developer

+919106129524 | amitprajapatimi4@gmail.com

Ahmedabad, India

PROFILE

Senior Flutter Developer with **5.5+ years** of experience building scalable, high-performance cross-platform applications across iOS, Android, Web, and Desktop.

Expert in **Clean Architecture, advanced state management, and performance optimization**, with a proven track record of delivering 15+ production-grade applications across fintech, productivity, IoT, and e-commerce domains.

Strong experience in **integrating AI (Google Vertex AI, OpenAI)**, real-time systems, and secure payment solutions, with end-to-end ownership from requirement gathering to deployment and optimization.

Skilled in designing robust and maintainable architectures focused on **scalability, modularity, and long-term code quality**.

Experienced in mentoring junior developers, improving development workflows, and enforcing best coding practices. Demonstrated ability to **optimize performance, reduce build times, and deliver seamless** user experiences using CI/CD pipelines and efficient release management.

CORE SKILLS

Languages & Frameworks: Flutter, Dart, Swift, SwiftUI, Node.js

State Management: Riverpod, BLoC/Cubit, GetX, Provider, RxDart

Architecture & Design: Clean Architecture, MVVM, MVC, Repository Pattern, Scalable System Design

Backend & Cloud: Firebase (Auth, Firestore, Storage, Cloud Functions), REST APIs, Node.js

Databases: SQLite, Isar, Hive, Cloud Firestore

Integrations & Features: AI (Gemini, OpenAI), In-App Purchases, Deep Linking, Push Notifications, Bluetooth, Video Calling

Tools & DevOps: Git, GitHub, CI/CD, Firebase Hosting, Play Store & App Store Deployment

WORK EXPERIENCE

Tibicle LLP, Ahmedabad

Sr. Software Developer

Dec 2025 - PRESENT

- Spearheading development of Planboards, a cross-platform Kanban productivity app deployed on iOS, Android, Web, macOS, and tablets
- Architected entire application from scratch using Clean Architecture with custom RxDart-based reactive state management
- Integrated AI voice-to-task feature using Google Vertex AI (Gemini) and OpenAI Whisper for intelligent task extraction
- Implemented in-app subscription system with server-side receipt validation using Node.js Cloud Functions
- Managing complete CI/CD pipeline, App Store & Play Store releases, and GitHub version control strategies

Vrinsoft Technology Pvt. Ltd., Ahmedabad

Sr. Software Developer

Feb 2024 - Dec 2025

- Stepped into a mid-level role, working under a Technical Lead while mentoring 2-3 junior developers on Flutter best practices and clean code standards.
- Delivered 5+ enterprise applications featuring advanced functionalities including video calls, screen sharing, and MetaMask wallet integration. Reduced app build time by 40% through Flutter flavors and build optimization techniques.
- Collaborated directly with international clients for requirement gathering, sprint planning, and seamless frontend-backend integration.

Codzgarage Infotech Pvt. Ltd., Ahmedabad

Software Developer

Apr 2023 - Feb 2024

- Collaborated closely with senior developers, gaining in-depth knowledge of scalable architecture patterns and native-side development with Swift and SwiftUI. Led development of AccountBook and Upvoit applications, ensuring pixel-perfect designs and optimal user experiences. Enforced coding best practices, worked with QA teams to identify and resolve defects efficiently.

KarmaLeen Technology Pvt. Ltd., Ahmedabad

Software Developer

Jul 2020 - Apr 2023

- Started as a junior developer role, building a strong foundation in Flutter development. Developed diverse mobile applications including music, storytelling, EMS, stock market, and learning platforms. Gained hands-on experience in client communication, UI design principles, and collaborative team workflows. Worked with Flutter, Dart, GetX, Provider, Firebase, SQLite, and managed Play Store & App Store deployments.

PROJECT EXECUTED

Planboards: A cross-platform Kanban-style productivity application similar to Trello, enabling users to create boards, lists, and cards for managing tasks, projects, and goals. The app is fully responsive and available on iOS, Android, Web, macOS, and optimized for tablets. Key features include AI-powered voice-to-task conversion using Gemini and OpenAI, rich text notes, real-time collaboration with role-based access, in-app subscriptions, offline support, deep linking for shared cards, and reminder notifications.

- **Technology Stack:** Flutter, Dart, Custom Reactive State Management (RxDart), Firebase (Auth, Firestore, Storage, Cloud Functions, Analytics, Crashlytics, Remote Config), Isar Local Database, Google Vertex AI, OpenAI Whisper & GPT, In-App Purchases, Flutter Quill, Node.js Cloud Functions
- **Responsibilities:** Worked as a dedicated developer, handling end-to-end development from architecture design to deployment across multiple platforms. Managed direct client communication, gathering requirements, and delivering updates throughout the project lifecycle. Architected the application from scratch using Clean Architecture principles with custom reactive state management. Built and maintained cross-platform responsive UI for iOS, Android, Web, macOS, and tablets with platform-specific optimizations. Handled app deployment and release management on both Play Store and App Store, including versioning, updates, and issue resolution. Maintained codebase versioning, branching strategies, and release tagging on GitHub for efficient collaboration and tracking.

La Bonne Semence: A feature-rich storytelling application similar to Kindle, integrating audio support for listening to story content. Other key functionalities include localization, bookmarking, content sharing, daily new story updates, reading progress retention, and push notifications.

- **Technology Stack:** Flutter, Dart, Provider State Management, SQLite, Push Notifications, Audio Streaming
- **Responsibilities:**
 - Collaborated with the management team to gather and refine requirements.
 - Designed and implemented intuitive UI layouts to enhance user interaction.
 - Integrated Provider for efficient state management and performance optimization.

[Play Store Link](#)

Upvoit: A service booking application inspired by UrbanClap and Just Dial, enabling users to seamlessly book services based on their requirements. Focused on delivering a smooth and user-friendly experience with real-time notifications and social login integration.

- **Technology Stack:** Flutter, Dart, Bloc (Cubit) State Management, Firebase, Social Login, Push Notifications, MVVM
- **Responsibilities:**
 - Collaborated with stakeholders to gather and define project requirements.
 - Implemented push notifications using Firebase Cloud Messaging (FCM).
 - Managed client communication, application upgrades, and issue resolution.

[Play Store Link](#)

DioSync: DioSync is an advanced inventory management application designed specifically for bars. It allows bar staff to efficiently track and calculate empty or half-empty bottles using a Bluetooth-connected device. The app streamlines stock management, reduces wastage, and enhances operational efficiency by providing real-time inventory insights.

- **Technology Stack:** Flutter, Dart, Bluetooth Plus, Getx state Management, SQLite, Firebase, Push Notifications, MVVM Architecture
- **Responsibilities:**
 - Led end-to-end development, from client communication to final delivery.
 - Designed and implemented Bluetooth connectivity using the bluetooth_plus package for real-time bottle measurement.
 - Developed a responsive and intuitive UI to ensure seamless user experience for bar staff.
 - Maintained and upgraded the app to latest Flutter versions, improving performance and security.

MilkClub: A comprehensive application for the dairy industry, facilitating learning, content creation, and sharing dairy-related information. The app seamlessly synchronizes with mobile and web platforms using in-app web views.

- **Technology Stack:** Flutter, Dart, GetX State Management, In-App Webview, Deep-Linking, MVC Architecture
- **Responsibilities:**
 - Worked closely with the management team to define project goals and features.
 - Developed and optimized UI layers for an intuitive user experience.
 - Integrated in-app web views for synchronized mobile-web interactions.
